

This guide shows how to cut popular shaped wedding tiers into pieces approximately 1 in. x 2 in. by two layers high (about 4 in.). Even if a larger serving size is desired, the order of cutting is still the same. The first step in cutting is to remove the top tier, and then begin the cutting with the 2nd tier followed by the 3rd, 4th and so on. The top tier is usually saved for the first anniversary, so it is not calculated into the serving amount.

The number of servings listed are intended as a guide only and offer a small portion of wedding cake. If cake is the only dessert and/or portions larger than 1"x2" are served, then you will have less servings than the chart indicates.

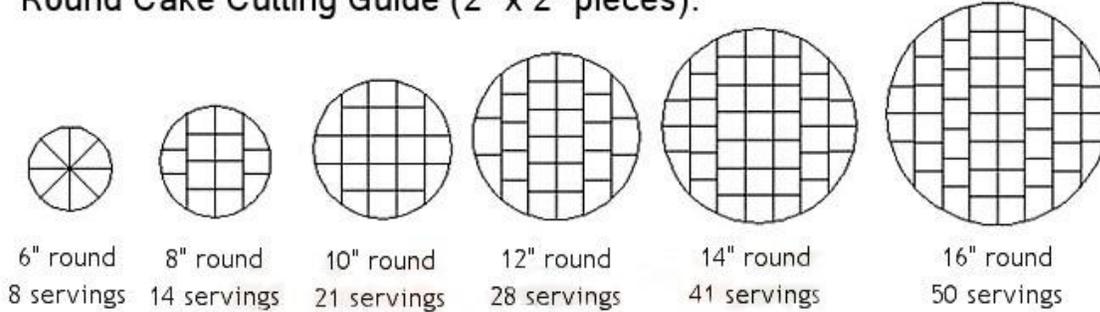

Round Tiers:

Move in two inches from the tier's outer edge; cut straight across and then slice 1 in. pieces within the slice. Now move in another 2 in., cut another slice 1 in. pieces and so on until the tier is completely cut.

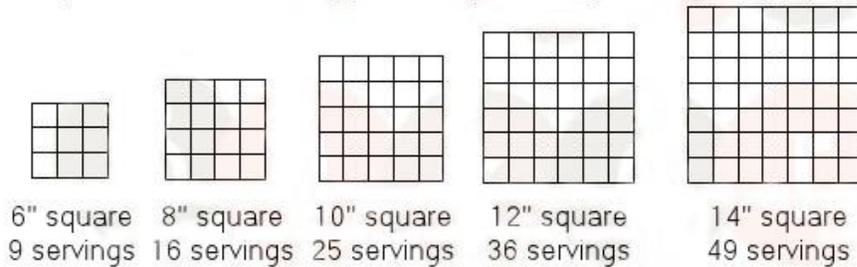

Square Tiers:

Move in 2 in. from the outer edge and cut across. Then slice 1 in. pieces of cake. Now move in another 2 in. and slice again until the entire tier is cut.

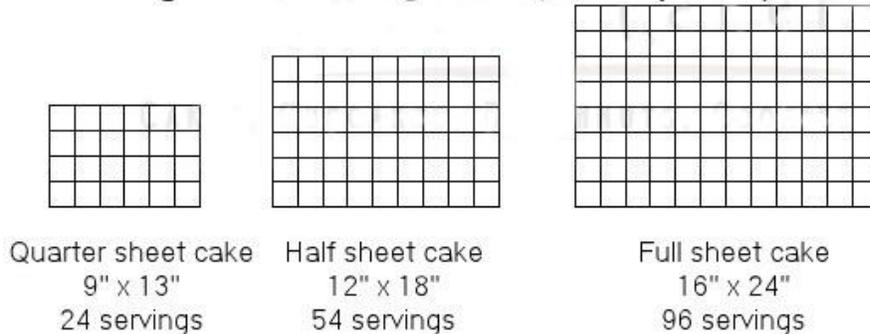

Round Cake Cutting Guide (2" x 2" pieces):

Square Cake Cutting Guide (2" x 2" pieces):

Rectangle Cake Cutting Guide (2" x 2" pieces):

This guide shows how to cut popular shaped party tiers into pieces approximately 2 in. x 2 in. by two layers high (about 4 in.). Even if a larger serving size is desired, the order of cutting is still the same. The first step in cutting is to remove the top tier, and then begin the cutting with the 2nd tier followed by the 3rd, 4th and so on.
